

What Can Ward's Science Help You Do This Summer?

1. Plan, redesign, or upgrade a lab and instructional space for science, healthcare or STEM with appropriate fixtures and furniture
2. Equip a summer science, STEM or career exploration camp
3. Provide independent summer science experiences for students with summer focused resources from Ward's World www.wardsworld.com
4. Replace old and degraded PPE and safety equipment for your science, CTE, and STEM labs
5. Inspire your teachers with new activities and instructional resources from Ward's World www.wardsworld.com
6. Write a grant to fund science, CTE, and STEM materials
7. Order the hands-on instructional materials needed for a new course offering.
8. Design instructional plans with science materials that support course content and learning standards
9. Source materials to fill student learning gaps created during pandemic instruction
10. Build a solar celebration learning experience for this school year's solar eclipse.
