

FACTS Application & Enrollment

All-in-One Admissions

Strategic enrollment practices are constantly changing. But what hasn't changed is the need to move quickly, be accurate, and create meaningful experiences for prospective and current families. FACTS Application & Enrollment is a cost-effective, feature-rich solution that admissions professionals can use to streamline processes and accomplish their goals – and then some.

Connect With Prospects

From the moment they hear about your school, it's critical that prospective families feel welcome. We'll help you give them as much information as they need and guide them through the process of exploring and (hopefully!) applying at your school.

- Admissions event scheduler
- Create and manage tasks for prospects
- Custom inquiry queue and custom reporting
- Send bulk emails to prospects, using variable fields to personalize them (and create templates to save time)
- Ability to auto-match inquiries to application

A Better Application Process

Your school is unique. Your online application process should be, too. Customize nearly every step of the application journey for parents with features like:

- Admissions dashboard, checklist, and task management for applicants
- Customizable application fields
- Skip logic and responsive triggers
- Custom application steps based on categories like grade level and sibling status
- Online recommendation form submission process
- Ability to attach documents of any format to the application
- Mobile-friendly interface for parents

Strategic Enrollment Management

One of the toughest things about enrollment is keeping track of all the information and meeting deadlines. By streamlining processes and taking advantage of data connectivity, it gets a whole lot easier.

- Siblings can enroll/re-enroll under a single application
- Mass update returning students' enrollment status with one click (particularly useful for continuous enrollment)
- Custom dashboard and task management
- Application and enrollment documents can be categorized and filed into individual portfolios
- Import/export data via CSV
- Auto-filled demographic fields for re-enrolling students/families when used with FACTS SIS
- Payments for application or registration/re-enrollment fees are automatically processed and reconciled in FACTS Tuition Management for easy tracking and reporting
- Comprehensive admissions and enrollment reporting
