

InsureTEK offers a **TURNKEY SOLUTION** to protect your school from water damage and to reduce your water utility costs including:

- A professional, **on-site risk assessment** to identify your vulnerable areas for water leaks and waste.
- The **best-in-class Internet of Things (IoT) water leak sensors** to fully cover your campus.
- The **maintenance and service** on ALL installed devices for the duration of our contract.
- **MasTec as a business partner to install your IoT sensor technology.**
- **Alerts sent to your designated staff** via text, calls and email whenever a leak or water event occurs.
- **InsureTEK's contact center** staffed by our employees to support you until the resolution of the water event.
- A **dashboard** using real time data to document the effectiveness for conserving water and preventing leaks.
- A **Performance Warranty** underwritten via our Lloyds of London Syndicate.
- **Cyber security insurance** maintained by InsureTEK for security against any 3rd party threats to our project and **Professional Liability Insurance** for our systems design and installation.
- **Real time Carbon Footprint reduction validation to show your efforts to preserve the environment for you to share with your faculty, students, parents and community**

All schools face a critical juncture in managing their water resources. The overt escape of water or undetected leaks can waste substantial amounts of scarce resources and cause untold thousands of dollars' worth of damage in a matter of a few hours to people and property. **Let InsureTEK protect you for one low monthly subscription fee.**
