

# Accelerate student engagement with Learning Services

We partner with your PreK-12 teachers to design student experiences based on the latest neuroscience research and instructional-best practices to promote a ProSocial Learning Ecosystem™ for student collaboration and accelerated engagement.

## SERVICES INCLUDE

- Training, lesson planning and side-by-side coaching support with our leading educational experts
- Onsite, Virtual or Hybrid trainings utilizing a learning management system
- A customized plan is co-developed with you based on your specific needs.

*“The indicator of success to me is that we can really see changes in the learning environments of the teachers and changes in the way they think about instruction and the way they think about student engagement.”*

*I’ve met a lot of vendors and worked with a lot of consultants, and I would like to say hats off to Meteor - your consultants are some of the most nurturing and caring people that I have met in a long time... [they] have really been instrumental in getting our feedback about what we want and designing a platform so everything we wished for has been able to occur.”*

Dr. Erica Fields  
Dir. of Learning Environments and Instructional Resources  
Richland One School District - Columbia, SC

# Developing a ProSocial Learning Ecosystem™

ProSocial Learning Ecosystems™ create the conditions for positive interdependence, challenging relevant experiences, and active respect within a diverse learning community.

We provide training and support to build teacher capacity in the following areas.

- **Learning at the Core:** Focus on how students learn and how teachers design relevant learning experiences
- **Collaborative Inquiry:** Spark curiosity through student-driven questions, investigations, and solutions to real-world problems
- **Respectful Communication:** Forge productive and courteous team conversations
- **Safety and Wellness:** Foster a climate promoting well-being through a sense of identity, significance, belonging, and hope
- **Caring Culture:** Honor inclusive relationships that respect the uniqueness of each learner, shape interactions that value diversity, and build a kind and helpful community
- **Ownership and Responsibility for Learning:** Develop efficacy, perseverance, self-reflection, and voice
