

POST-SEASON: the right time to think about maintenance for your synthetic turf field!

Now that football has wrapped up, your fields may see a small break in activity, and it's the perfect time to schedule maintenance, inspections and testing necessary to maintain your warranty and insurance requirements.

Synthetic turf fields are amazing because they can take a beating from multiple sports and multiple teams, and, if maintained properly, will perform well for all. Less rain outs and maintenance overall, there's a reason why so many facilities are adding a synthetic turf field to their campus. Maintenance is still necessary, but it doesn't have to be a hassle.

Advanced Sports Group has maintenance options for all sized schools and programs, and we can even do maintenance, testing and repairs on fields we did not build.

Watch this video for more information regarding WHY maintenance is so important and our approach to it:
