

SUCCESS SPORTS SURFACING, LLC

Success Story: Savannah Christian Preparatory School Gym Floor Sanding and Refinishing Project

Question #1: What prompted your school to sand & refinish your floor? (i.e. damage to the floor, rebranding of school mascots/colors, timing or age of the floor, etc.)

Answer: The floor that was down in our gym was from the original construction of the building, so it was around 15 years old. The logos and lines were becoming dated and we wanted to enhance the appearance for our athletes and community.

Question #2: Why did you select Success Sports Surfacing for this very important project?

Answer: We have dealt with various court resurfacing companies and received quotes from multiple vendors, but after speaking to some references, we believed Success Sports Surfacing was the best option for us. We were able to call a number of credible schools and got nothing but positive feedback.

Question #3: Were you pleased with the design process, overall communication, and scheduling of the project?

Answer: Dave and Andrew walked us through the entire design process. They communicated well and answered anytime I called and had a question throughout the process. They worked with us on a timeline so we could have it done for our summer activities.

Question #4: Briefly describe your experience with the Success Sports Surfacing personal on site.

Answer: Manny and his crew were amazing. Manny knew exactly what he was doing and worked quickly and efficiently. He discussed the process with us as he was moving through the various steps. Manny deserves a raise.

Question #5: Briefly describe your satisfaction with the overall outcome of the project.

Answer: Our gym floor has received a facelift and we are proud of our finished product.
