#### What You Need From an SIS

A student information system is the data core for your school. When you choose an SIS, you make a long-term investment of time, resources, and energy across your institution. And that's how it should be. Your SIS forms the stable architecture from which you derive your school's single source of truth.

#### **Getting Started**

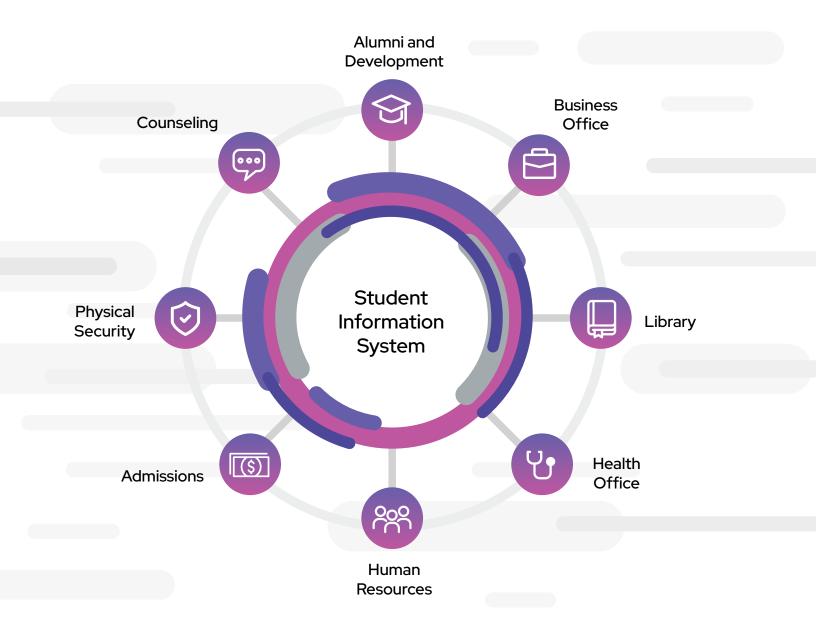

We're here to help you cut through the noise and discover what your school needs from an SIS (and what the journey looks like to get there). As you work through this guide, think about how your SIS will eventually impact the objectives and goals of every department at your institution, including:

- · Five-year enrollment projections
- Year-over-year budget goals
- Student outcomes
- · Improved communication metrics to families
- Healthier inquiry pipeline
- Better fundraising appeals and campaigns
- · Advanced reporting and transparency across the school

|        |  |  |  |
|        |  |  |  |
|        |  |  |  |

#### A Whole-School Solution

Student information systems interact with and connect all areas and departments of your school. On the next couple of pages, we'll take a closer look at the two most common SIS solution structures.

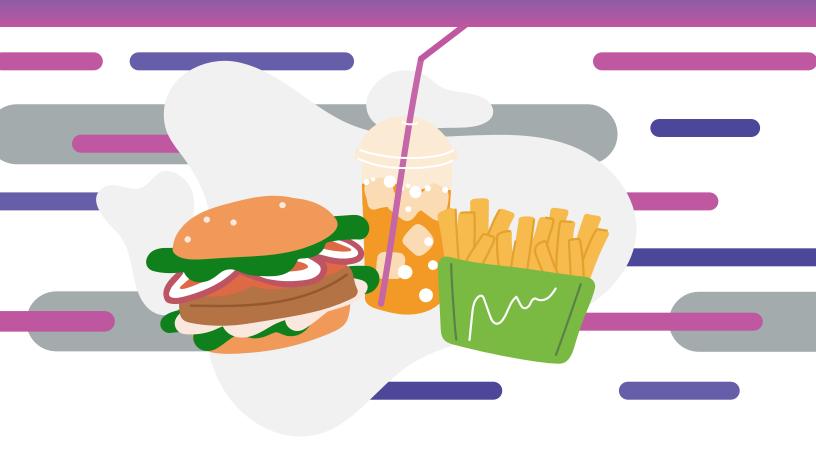

#### **Solution Structure 1: Full Menu**

Choosing an SIS can feel like deciding which fast-food restaurant to visit for dinner. Everyone has burgers and fries on the menu, but which has the best? All the menus look the same!

A fully integrated SIS solution is the equivalent of getting one of everything on the menu: a burger, fries, drink, and dessert. A fully integrated SIS menu comes with benefits like:

- · A single source of truth for data and reporting
- Ease of use and single sign-on for parents, students, and teachers
- Consolidated onboarding, training, and professional development
- Decreased number of customer support contacts
- Time savings with automated processes and efficient reconciliation

| Notes: |  |  |  |
|--------|--|--|--|
|        |  |  |  |
|        |  |  |  |
|        |  |  |  |
|        |  |  |  |

#### **Solution Structure 2: The Combo**

Sometimes you want to go to three different restaurants for your burger, fries, and drink. The alternative to a fully integrated SIS is a combo solution. The technology infrastructure is designed around software purchased from various providers that is analyzed to give you the best offering in each area. Benefits of this structure include:

- Allows for more experimentation because system upgrades aren't dependent on a single solution.
- · Freedom to explore an array of solutions that suit each department
- IT team members can be more specialized because they don't have to support the whole infrastructure
- Possibility for a shorter implementation timeframe with staged onboarding
- · Flexibility to make competitive shifts as new software becomes available

|        |  |  |
|        |  |  |

#### **Features for Everyone**

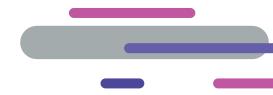

Your student information system affects everyone at your school, so it's important to consider the needs of your administration, teachers, and parents in addition to your school's infrastructure. Before you start shopping for a new SIS, evaluate what features you currently have and what you're missing. We've compiled an extensive list to help you determine your priorities.

| Notes: |  |  |  |
|--------|--|--|--|
|        |  |  |  |
|        |  |  |  |
|        |  |  |  |
|        |  |  |  |
|        |  |  |  |

#### **For Administrators**

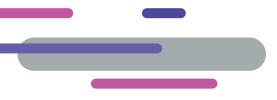

# **Student Inquiry**

| Feature   | Have It | Need It |
|---|---------|---------|
| Student and family CRM functionality for prospects  |         |         |
| Customizable student checklist for admissions office personnel                                    |         |         |
| Standard or customizable online inquiry form  |         |         |
| Data separation between prospective and enrolled students in the SIS                              |         |         |
| Track completion of the inquiry process   |         |         |
| Reporting on the number of inquiries by grade   |         |         |
| Ability to add sub-statuses or tracking mechanisms for inquiries                                  |         |         |
| Admissions event management, including automated RSVP reminders, cancellations, and modifications |         |         |
| Add individual tasks to prospects with due dates and task management list                         |         |         |

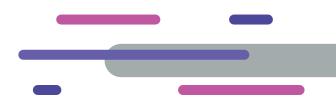

#### **Admissions**

| Feature   | Have It | Need It |
|---|---------|---------|
| Track students applying for school over multiple years  |         |         |
| Provide a customizable online application, including multiple forms   |         |         |
| Allow upload of supporting documentation by parents during the application process  |         |         |
| Provide electronic reference forms for external teachers, coaches, principals, etc.   |         |         |
| Manage an application waiting list  |         |         |
| Allow current families to apply for siblings without<br>an additional set of credentials and automatically bring<br>over family demographic information |         |         |
| Migrate students from application to enrolled status without requiring re-entry of data   |         |         |
| Admissions event management, including automated RSVP reminders, cancellations, and modifications   |         |         |
| Report application status of prospective students and summarize by grade  |         |         |

#### **Re-Enrollment**

| Feature   | Have It | Need It |
|---|---------|---------|
| Progress students to the next grade en masse at the end of the school year                        |         |         |
| Provide an online re-enrollment process with majority of data pre-populated                       |         |         |
| Allow parents to upload updated documentation via an online portal                                |         |         |
| Allow current parents to access re-enrollment without having an additional set of credentials     |         |         |
| Allow students to request courses online  |         |         |
| Track completion of the re-enrollment process   |         |         |
| Easily report on retention rate, new enrollments, and statistics in multiple formats              |         |         |
| Admissions event management, including automated RSVP reminders, cancellations, and modifications |         |         |
| Report application status of prospective students and summarize by grade                          |         |         |

# **Student Tracking**

| Feature  | Have It | Need It |
|--|---------|---------|
| Track student contact, address, and demographic information                              |         |         |
| Track student grade level and enrollment status  |         |         |
| Display student pictures   |         |         |
| Mass upload student pictures   |         |         |
| Record student automobile information  |         |         |
| Record student public school district information  |         |         |
| Record student church affiliation and significant religious dates                        |         |         |
| Record student standardized test scores, including mass upload of multiple scores        |         |         |
| Provide custom fields to track any additional school-specific information                |         |         |
| Show student dashboard to see useful information at a glance                             |         |         |
| Easily track student behavior, advisor meetings, and community service hours             |         |         |
| Link students to siblings and parents  |         |         |
| Show student dashboard to see useful information at a glance                             |         |         |
| Link students to grandparents and emergency contacts                                     |         |         |
| Provide security-specific electronic student portfolio to house all electronic documents |         |         |

# **Staff Tracking**

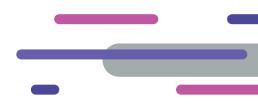

| Feature  | Have It | Need It |
|--|---------|---------|
| Track staff member contact, address, title, and department information                               |         |         |
| Record degrees, certifications, and continuing education/training                                    |         |         |
| Track staff HR information (security-specific) such as salary and compensation and behavior events   |         |         |
| Provide custom staff fields  |         |         |
| Manage use of substitutes for absent teachers  |         |         |
| Track user-specific security rights for each faculty and staff member                                |         |         |
| Conduct and track staff observations and evaluations   |         |         |
| Provide a security-specific electronic staff portfolio to house all electronic documents and records |         |         |

| Notes: |  |  |  |
|--------|--|--|--|
|        |  |  |  |
|        |  |  |  |
|        |  |  |  |
|        |  |  |  |

#### **Course and Class Information**

| Feature   | Have It | Need It |
|---|---------|---------|
| Record course description that populates into a course catalog  |         |         |
| Record course standards and allow mass upload via import tool   |         |         |
| Record skill sets associated with courses   |         |         |
| Record available course credits and course levels (Standard, AP, Honors)                                |         |         |
| Record how course averages are treated on report cards and transcripts                                  |         |         |
| Assign pre-requisites, co-requisites, and grade level defaults to courses                               |         |         |
| Create multiple sections of a class at one time   |         |         |
| Record class instructors, room number, day of week, period number, and terms where the class is offered |         |         |
| Create classes for sports teams or activities to record student participation                           |         |         |

#### Communication

| Feature  | Have It | Need It |
|--|---------|---------|
| Build dynamic group email distribution lists by enrollment status, grade level, class, activity, etc.  |         |         |
| Send emails to parents, students, and staff via point-and-click without looking up email addresses   |         |         |
| Automatically assign email signatures to all outgoing emails   |         |         |
| Automatically send a carbon copy of email to sender  |         |         |
| Easily track email history for user and/or schoolwide correspondence   |         |         |
| Create email newsletter templates that can be shared schoolwide  |         |         |
| Schedule weekly emails to automatically distribute progress reports, excessive absences, missing work, current grades, etc., to parents and other designated staff |         |         |

#### **Food and Nutrition Services**

| Feature   | Have It | Need It |
|---|---------|---------|
| Post lunch menu calendars online  |         |         |
| Allow parents to order, view, and pay for lunches and past balances online                            |         |         |
| Allow lunch ordering from the classroom   |         |         |
| Provide point-of-sale capability for lunch line for à la carte items                                  |         |         |
| Provide barcode and fingerprint scanning to identify students purchasing lunch through the lunch line |         |         |
| Manage free and reduced lunch billing   |         |         |

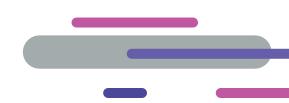

## **Health Management**

| Feature   | Have It | Need It |
|---|---------|---------|
| Record shot records and determine immunization compliancy                       |         |         |
| Track doctor, dentist, preferred hospital, and permission to treat information  |         |         |
| Record instructions for scheduled medications                                   |         |         |
| Track medical conditions and allergies  |         |         |
| Maintain a medical event log  |         |         |
| Allow security-controlled upload of medical documents into students' portfolios |         |         |

# **Behavior Management**

| Feature   | Have It | Need It |
|---|---------|---------|
| Document discipline events, sanctions, and demerits                             |         |         |
| Automatically email documented discipline event notices to parents              |         |         |
| Automatically post documented discipline events to a parent portal              |         |         |
| Document parent/teacher conference discussions                                  |         |         |
| Maintain a medical event log  |         |         |
| Allow security-controlled upload of medical documents into students' portfolios |         |         |
|   |         |         |

| Notes: |  |  |  |
|--------|--|--|--|
|        |  |  |  |
|        |  |  |  |
|        |  |  |  |
|        |  |  |  |
|        |  |  |  |
|        |  |  |  |

## **Elementary and High School Scheduling**

| Feature  | Have It | Need It |
|--|---------|---------|
| Enroll/un-enroll individual students into individual classes (elementary)                                    |         |         |
| Enroll/un-enroll individual students into a group of classes simultaneously (elementary)                     |         |         |
| Develop schedules around specialty classes, i.e. music, art, PE (elementary)                                 |         |         |
| Allow scheduling for next school year while in the current school year (high school)                         |         |         |
| Create a non-conflicting student, staff, and room schedule (high school)                                     |         |         |
| Support straight five-day, block, rotating block, and weekend class schedules (high school)                  |         |         |
| Set prerequisites and grade level restrictions to determine which courses students can request (high school) |         |         |
| Allow students to request courses online, which drives request-<br>based scheduling (high school)            |         |         |
| Allow multiple scheduling templates to accounts for additional academic programs (high school)               |         |         |

## Report Cards, Transcripts, Class Rank, and Honors

| Feature   | Have It | Need It |
|---|---------|---------|
| Automatically load term-ending grades from gradebook to report card                     |         |         |
| Allow hand entry of term-ending grades  |         |         |
| Automatically calculate semester and final grades                                       |         |         |
| Automatically load attendance results onto report card                                  |         |         |
| Allow skill set grading   |         |         |
| Allow entry of comments, comment codes, and citizenship codes onto report cards         |         |         |
| Monitor and report missing report card grades   |         |         |
| Provide free report card templates  |         |         |
| Provide completely customized report cards  |         |         |
| Store historical transcript information for enrolled, withdrawn, and graduated students |         |         |
| Automatically load report card grades onto transcripts                                  |         |         |
| Provide free transcript templates   |         |         |
| Provide completely customized transcripts   |         |         |
| Support multiple GPA calculations   |         |         |
| Display GPA, class rank, attendance, and standardized test results                      |         |         |
| Calculate class rank and/or honor roll by GPA, UGPA, or average                         |         |         |
| Use report card or transcript grades for class rank and honor roll calculation          |         |         |
| Provide flexibility to include or exclude electives                                     |         |         |

## Reporting

| Feature  | Have It | Need It |
|--|---------|---------|
| Provide canned, standard reports for each functional area    |         |         |
| Provide ad-hoc query capability                              |         |         |
| Provide database exports for external analysis and reporting |         |         |

| Notes: |  |  |  |
|--------|--|--|--|
|        |  |  |  |
|        |  |  |  |
|        |  |  |  |
|        |  |  |  |
|        |  |  |  |
|        |  |  |  |
|        |  |  |  |
|        |  |  |  |
|        |  |  |  |
|        |  |  |  |
|        |  |  |  |
|        |  |  |  |
|        |  |  |  |

#### **For Teachers**

#### **Attendance**

| Have It | Need It |
|---------|---------|
|         |         |
|         |         |
|         |         |
|         |         |
|         |         |
|         |         |
|         |         |
|         | Have It |

# **Behavior Management**

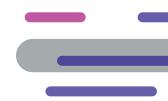

| Feature   | Have It | Need It |
|---|---------|---------|
| Create daily lesson plans and associate course objectives that are documented in the course description   |         |         |
| Automatically add homework assignments, documented in the gradebook, to lesson plans                      |         |         |
| Automatically post lesson plans to parent portal  |         |         |
| Automatically move lesson plans forward or backward for virtual learning, holidays, etc.                  |         |         |
| Share lesson plans among different sections of the class  |         |         |
| Create master lesson plans to reuse on an ongoing basis   |         |         |
| Create assignments with flexible point values and weightings and associate them with any grading category |         |         |
| Copy assignments from one class gradebook to another  |         |         |
| Assign due dates to homework and in-class assignments   |         |         |
| Create master lesson plans to reuse on an ongoing basis   |         |         |
| Automatically post homework assignments and due dates on the parent portal                                |         |         |

#### **For Parents**

#### Secure Access, School Information, Student Info, and Online Forms

| Feature  | Have It | Need It |
|--|---------|---------|
| Provide secure SSL logins for parents  |         |         |
| Allow parents to access information on multiple children in the family simultaneously with a single login      |         |         |
| Control which children, parents, or family members have access to view in the case of unique family situations |         |         |
| Post school announcements and calendar items   |         |         |
| Post picture galleries   |         |         |
| Post lunch menus and allow online lunch ordering   |         |         |
| Post newsletters and other school resources  |         |         |
| Display school and staff directories   |         |         |
| Display student grades and progress reports in real time directly from the teacher gradebook                   |         |         |
| Display homework assignments in real time directly from the teacher gradebook                                  |         |         |
| Display today's homework for all children in a family on a single screen and single report                     |         |         |

| Feature  | Have It | Need It |
|--|---------|---------|
| Display today's homework for all children in a family on a single screen and single report |         |         |
| Display teacher lesson plans directly from the teacher gradebook                           |         |         |
| Display student attendance items   |         |         |
| Display discipline events  |         |         |
| Display history of medical events  |         |         |
| Display student schedules  |         |         |
| Display report cards   |         |         |
| Display transcripts  |         |         |
| Post surveys online for parents to view and complete                                       |         |         |
| Provide the re-enrollment process online for parents to complete                           |         |         |
| Provide demographic forms online for parents to view and update                            |         |         |
| Provide permission slips online for parents to complete                                    |         |         |
| Provide a screen for updating parent passwords   |         |         |

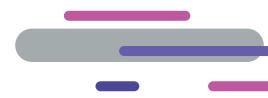

#### For Your Infrastructure

#### **In-Product Integration**

| Feature  | Have It | Need It |
|--|---------|---------|
| Provide all features and functionality in a single, integrated solution  |         |         |
| Data entered into one feature area is immediately available in other areas that use that data                          |         |         |
| Immediately display the names of students in teacher gradebooks when they are enrolled in classes                      |         |         |
| Immediately display grades and homework assignments in the parent portal when they are entered in teacher's gradebooks |         |         |

#### **Cloud-Based Access**

| Feature  | Have It | Need It |
|--|---------|---------|
| Provide access to all administrative, academic, and infrastructural features and areas via cloud-based frontend applications |         |         |
| Ability for faculty and staff to perform their jobs whether they are at school or working remotely/virtually                 |         |         |
| Allow parents to log into parent portal from any device (phone, laptop, tablet, etc.) with internet access                   |         |         |
| Entire SIS and parent portal are mobile responsive   |         |         |

## **Remote Hosting**

| Feature   | Have It | Need It |
|---|---------|---------|
| Remotely hosted servers house data and provide web access |         |         |
| Servers are maintained and data is backed up daily        |         |         |
| Disaster recovery of data is available                    |         |         |

| Notes: |  |
|--------|--|
|        |  |
|        |  |
|        |  |
|        |  |
|        |  |
|        |  |
|        |  |
|        |  |
|        |  |
|        |  |

# **Support Services**

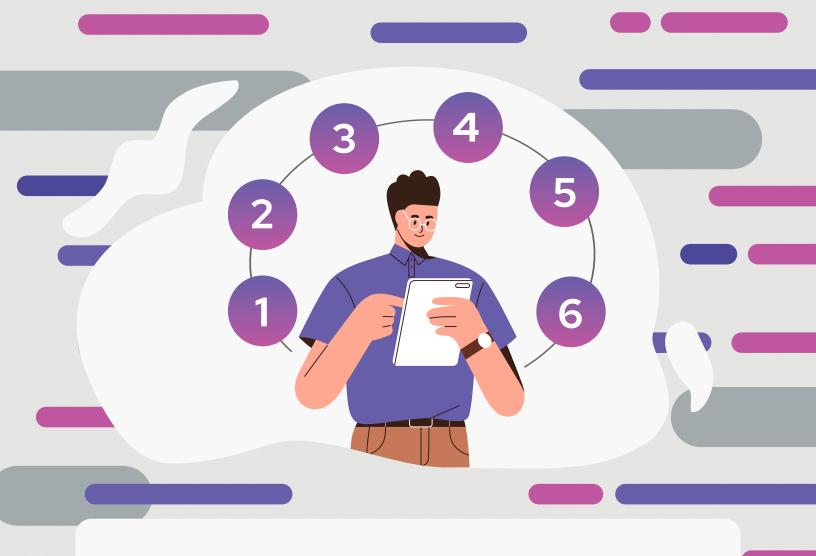

| Feature   | Have It | Need It |
|---|---------|---------|
| Convert existing data and load into a new database at no extra cost                                     |         |         |
| Set up software to match operation of school at no extra charge   |         |         |
| Provide initial training onsite or online as requested  |         |         |
| Provide completely customized report cards to display and calculate grades as defined by school         |         |         |
| Provide completely customized transcripts to display and calculate grades and GPAs as defined by school |         |         |
| Provide custom reports for a fee as defined by school   |         |         |
| Provide online training and documentation of SIS areas and feature sets                                 |         |         |
| Provide all software upgrades free of charge  |         |         |
| Provide on-demand live phone support for questions and technical issues                                 |         |         |
| Provide email support   |         |         |
| Provide money-back satisfaction guarantee   |         |         |

## **Third-Party Integrations**

| Feature   | Have It | Need It |
|---|---------|---------|
| Integrate with third-party providers using real-time data exchanges or data imports/exports |         |         |
| Integrate with learning management systems  |         |         |
| Integrate with fundraising software   |         |         |
| Integrate with website content management solutions   |         |         |
| Integrate with IEP software   |         |         |
| Integrate with emergency alert services   |         |         |
| Integrate with accounting packages  |         |         |
| Integrate with providers of managed tuition services  |         |         |
| Provide on-demand live phone support for questions and technical issues                     |         |         |
| Provide email support   |         |         |

#### What to Expect: Implementation

Upgrading your SIS is a significant investment of financial and people resources. Researching providers, choosing a system, implementation, onboarding, and training all have a resource impact on your institution. It's important to choose an SIS provider who will help you through every step of the process and offer solutions customized to your school's unique needs.

Implementation doesn't stop at prescribed dates and times. You need a provider who offers ongoing support to help your school community adopt your new system. Here are a few stages you can expect during implementation.

- 1. Kickoff Call
- 2. Data Collection, Conversion, and Database Setup
- 3. Milestone and Progress Check-ins
- 4. Continued Team Training
- 5. Designated Account Maintenance Team
- 6. Delayed/Final Data Conversion

#### **Next Steps**

Embarking on a journey to find a new student information system requires trust and partnership between a school and provider. Transparency about milestones, expectations, and needs is crucial.

At this point, you've considered which type of solution structure you want, what features you need, and what expectations you should have for the implementation process. But before you sign a contract, it's also necessary to evaluate an SIS provider's values and business practices.

Ask yourself questions like:

- How long has this provider been in the business?
- · How many schools does this provider serve?
- · What technology and innovation investments does this provider make?
- · What type of customer service model does this provider offer?
- What are this provider's data security standards?
- How does this provider's mission align with my school's mission?

#### **Need Help Navigating the Process?**

We know choosing an SIS is a big decision. FACTS is here to help. <u>Our team of experts</u> is available to answer your questions and provide advice relevant to your school's specific needs.

That's why FACTS is trusted by over 12,000 schools. We believe in improving school management through service and technology. And we are committed to helping school communities solve the unique challenges they face.

Ready to take the next step with FACTS?
